

Serology Water bath

The Tissue Flotation Water Bath is a specialized laboratory instrument designed to aid in the preparation of tissue samples for histological analysis. It is ideal for use in pathology labs, hospitals, and research facilities.

Features

- High-brightness LCD display, real-time display of temperature.
- Highly sensitive temperature control integrated unit, high precision and reliable performance.
- With over-temperature alarm function.
- Using new heating materials, heating fast, uniform heating, low thermal inertia, energy saving and reliable.
- With memory function. The set temperature is automatically retained.
- The work surface is sprayed for corrosion resistance.
