

# Refrigerators

Managing, Cold Chain Efficiently...

**PHARMACY | BLOOD BANK | CLINICAL**

**The First Professional Medical-grade Refrigerators**

Solutions are the first cold-storage solution to offer optimized control in all three areas and offer the following benefits:

## Temperature Management

### Uniformity

Temperatures are maintained within  $\pm 1^\circ\text{C}$  throughout the unit. This provides confidence that contents are stored at the right temperature regardless of where they are placed within the unit.

### Recovery

Faster recovery after prolonged door openings. Forced-air circulation keeps contents at the right temperature even when the unit is opened multiple times per hour for stocking, inventory counts and product retrieval.

### Stability

Maintain superior temperature stability. This creates fewer deviations from the set point and avoids rapid, significant changes in temperature ensuring that patient samples, medications/vaccines or blood therapies are always in their optimal storage environment.

## Professional Medical-grade Refrigeration - LuxMed® Cooling System

### Noise Management

Designed for noise-sensitive areas such as medication rooms, pharmacies, labs, and patient rooms, LuxMed® professional medical-grade refrigerators are up to 3x quieter than traditional models leading to better rest for patients and fewer distractions for healthcare personnel.
